**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Quayle Action***

1. This application is in condition for allowance except for the following formal matters:

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "key input unit" (claim 3) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The abstract of the disclosure is objected to because of the inclusion of legal phraseology, such as “comprises” (page 15, line 3). Correction is required. See MPEP § 608.01(b).

4. The disclosure is objected to because of the following informalities:

- a. Page 5, line 24, “I<sup>2</sup>C, bus” should be “I<sup>2</sup>C bus,”.
- b. Page 7, line 18, “I2C” should be “I<sup>2</sup>C”.
- c. Page 10, line 11, “A, description” should be “A description”.

Appropriate correction is required.

### ***Claims***

5. Claims 1 and 5 contain the following informalities:

- a. Claim 1, line 9, “A/D conversion units (emphasis added)” should be “A/D conversion unit” (see claim 1, line 6).
- b. Claim 1, line 11, “the slave devices (emphasis added)” should be “the slave device” (see claim 1, line 8).
- c. Claim 1, line 13, “the slave devices (emphasis added)” should be “the slave device” (see claim 1, line 8).
- d. Claim 5, line 10, “the slave devices (emphasis added)” should be “the slave device” (see claim 5, line 3).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

6. Claims 1 through 6 are allowable over the prior art.
7. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record (especially, US Pat. No. 5,920,407) does not teach or suggest an image forming device/method comprising a plurality of detection sensors for detection operation states of the peripheral devices (emphasis added), and a master device for requesting to the slave device the detection result signal (after converted into the digital signals by the A/D conversion unit) of the at least one of the detection sensors in order to verify the operation states of the peripheral states.

***Citation of Pertinent Prior Art***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Erickson et al. (US Pat. No. 5,920,407) discloses an image forming device comprising a photosensitive detector array; an A/D conversion unit; a slave device; and a master device.

Selz et al. (US Pat. Pub. No. US 2004/0124871 A1) discloses apparatuses having an I2C bus.

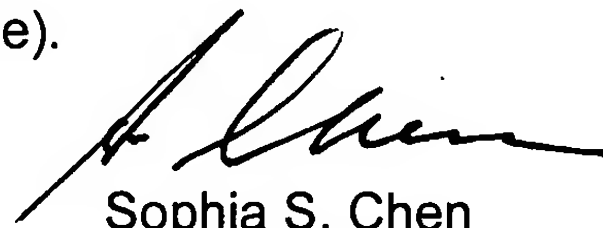

Buckland et al. (US Pat. Pub. No. US 2004/0177195 A1) discloses an I2C bus being used for communication.
